CHETTINAD CEMENT - MANUFACTURING CAPACITIES

Chettinad Cement (CCCPL) - Total 14.64 MTPA

APCL (Subsidiary of CCCPL) - 1.0 MTPA

Bhavya Cement - 1.2 MTPA

PRODUCT RANGES

CHETTINAD SUPER GRADE

Portland Pozzolana Cement

IS:1489-2015

Chettinad Supergrade is suitable for all construction works

Provides Superior finish as more number of fine particles compensates adverse effect of improper grading of coarse and fine aggregates

Superior choice than OPC for construction of structures in coastal and marine areas

CHETTINAD OPC 43 & OPC 53

Ordinary Portland Cement

IS:269-2015

Ideally suited for Ready Mix Concretes & Hollow Blocks

Best suited for pre-cast and pre-stressed construction. Early transfer of stresses tends to economize on time and money by lowering cycle time

Suitable for all general and specialised constructions

CHETTINAD CLASSIC

Portland Slag Cement

IS: 455- 1989

Most suitable for coastal and marine constructions

Used for structures below the ground and for those that are in contact with water containing sulphates and chlorides

Mass concrete applications like large foundations, concrete roads

CHETTINAD SULPHATE RESISTING PORTLAND CEMENT

Sulphate Resisting Portland Cement

IS: 12330 - 1988

Ideal for marine environments especially, If there is aggressive sulphate contents in subsoil and underground water.

Chettinad SRPC is used in all conditions where the concrete is exposed to attack by sulphates or if the structure is close to marine environment

CHETTINAD COMPOSITE

Composite Cement

IS: 16415 – 2015

Suitable for Effluent, Sewage and Water Treatment Plants

This is All Purpose Cement and can be used for all construction applications

Pre - Cast concrete works

All types of residential, commercial & industrial constructions

CHETTINAD MAXCRETE

Portland Pozzolana Cement

IS:1489 - 2015

Ideal choice for concreting applications due to its high one day strength and quick setting time

Suitable for all domestic and commercial constructions

Chettinad cement

Perfect Concrete Choice
